

Table Specifications:

Model	Q111
Capacity / Weight	0.8-2.5
Capacity / Weight	21
Capacity / Weight	21800
Capacity / Weight	280 * 200 * 30
Capacity / Weight	270
Capacity / Weight	4800
Capacity / Weight	17010 * 1010 * 1330

Features:

The machine is designed for high precision and efficiency. It features a fully automatic control system, ensuring consistent quality and minimal operator intervention. The machine is equipped with advanced sensors and a robust frame, making it suitable for industrial environments. Its compact design allows for easy integration into existing production lines. The machine's performance is optimized for high-speed processing, with a cycle time of approximately 2.5 seconds per unit. The automatic control system includes a user-friendly interface, allowing for easy parameter adjustment and monitoring. The machine's safety features include emergency stop buttons and safety interlocks, ensuring operator safety during operation. The machine's maintenance is simplified, with easy access to key components for inspection and repair. The machine's overall design is focused on maximizing uptime and minimizing downtime, ensuring a high return on investment for the user.
