

Table 1: Parameters

Table 1	1000
(1) Number of trials	1000
(2) Number of conditions (2 conditions)	28
(3) Number of trials per condition	1.5
(4) Number of trials per block	250
(5) Number of blocks	1000 × 2
(6) Number of trials / block	50-70
(7) Number of trials	250
(8) Number of trials per condition	1100 × 1100 × 1600

Table 2:

1. The .chocolate condition is controlled by the number of trials and the number of conditions.

The number of trials per condition is controlled by the number of trials.

2. The number of trials per condition is controlled by the number of trials and the number of conditions. The number of trials per condition is controlled by the number of trials.

3. The number of trials per condition is controlled by the number of trials and the number of conditions. The number of trials per condition is controlled by the number of trials.

:The number of trials per condition is controlled by the number of trials. The number of trials per condition is controlled by the number of trials. 1. The number of trials per condition is controlled by the number of trials and the number of conditions. 2. The number of trials per condition is controlled by the number of trials.

Table 3:

1. The number of trials per condition is controlled by the number of trials and the number of conditions. The number of trials per condition is controlled by the number of trials.

The number of trials per condition is controlled by the number of trials and the number of conditions. 2. The number of trials per condition is controlled by the number of trials.
