

Table Specifications:

Model	Q111
Capacity (kg / hour)	0.8-2.5
Number of Channels (Moulds)	21
Machine Width (Moulds / Channels)	21800
Machine Height (mm)	280 * 200 * 30
Machine Depth (mm)	270
Weight (kg)	4800
Power Requirement (kw)	* 1010 * 1330 17010

Features:

The machine is designed for high efficiency and safety. It features a fully automatic demoulding system, ensuring consistent quality and reducing manual labor. The machine is equipped with a robust frame and high-quality components for long-term durability. It also includes a safety interlock system to prevent accidents during operation. The machine is easy to maintain and clean, with a wide range of adjustment options for different product specifications. The automatic system ensures precise temperature control and consistent output, making it ideal for large-scale industrial production.
