

Technical Specifications:

Weight	600
Dimensions (mm / inch)	600
Maximum thickness (mm)	≤25
Roasting process (mm)	47
Temperature (°C)	6-7
Moisture content (mm)	7.5
Grain size (mm)	6
Weight (mm)	850
Dimensions (mm)	* 800 * 1850 750

Technical Specifications:

The product is a special type of grain, processed using a special roasting process. The grain is milled to a fine consistency, resulting in a soft texture. The product is suitable for use in a variety of applications, including as a base for soups, stews, and other dishes. The grain is milled to a fine consistency, resulting in a soft texture.

Technical Specifications & amp; Technical Specifications:

1. The product is a special type of grain, processed using a special roasting process.
2. The grain is milled to a fine consistency, resulting in a soft texture.
