

Material Specifications:

Material	600
Material Thickness (mm)	600
Material Type (Material)	32
Material Thickness (mm)	0.75
Material Thickness (mm)	60
Material Thickness (mm)	500 x 2
Material (mm / cm)	15
Material Thickness (mm)	* 700 * 1100 700
Material (mm)	120

Notes:

Material specifications apply to all material quantities. Material types include colorized aluminum, stainless steel, and other materials. Material thicknesses are specified in millimeters (mm) and centimeters (cm). Material dimensions are specified in millimeters (mm) and centimeters (cm). Material thicknesses are specified in millimeters (mm) and centimeters (cm). Material dimensions are specified in millimeters (mm) and centimeters (cm). Material thicknesses are specified in millimeters (mm) and centimeters (cm). Material dimensions are specified in millimeters (mm) and centimeters (cm). Material thicknesses are specified in millimeters (mm) and centimeters (cm). Material dimensions are specified in millimeters (mm) and centimeters (cm).

Material & amp; Specifications:

- Material type is colorized aluminum, stainless steel, and other materials.
- Material thickness is 600 mm.

Notes:

Material specifications apply to all material quantities. Material types include colorized aluminum, stainless steel, and other materials. Material thicknesses are specified in millimeters (mm) and centimeters (cm). Material dimensions are specified in millimeters (mm) and centimeters (cm). Material thicknesses are specified in millimeters (mm) and centimeters (cm). Material dimensions are specified in millimeters (mm) and centimeters (cm).
